

DATA SHEET

ARUBA CENTRAL

Aruba Central, a cloud platform for managing Aruba Instant wireless LANs and Aruba Mobility Access Switches, offers IT organizations a simple and effective way to manage and monitor their mobility networks. It also offers customizable guest Wi-Fi and application analytics.

With Aruba Central, you can get anywhere-anytime access to ensure your network is up and performing efficiently. No additional management appliances need to be installed or maintained.

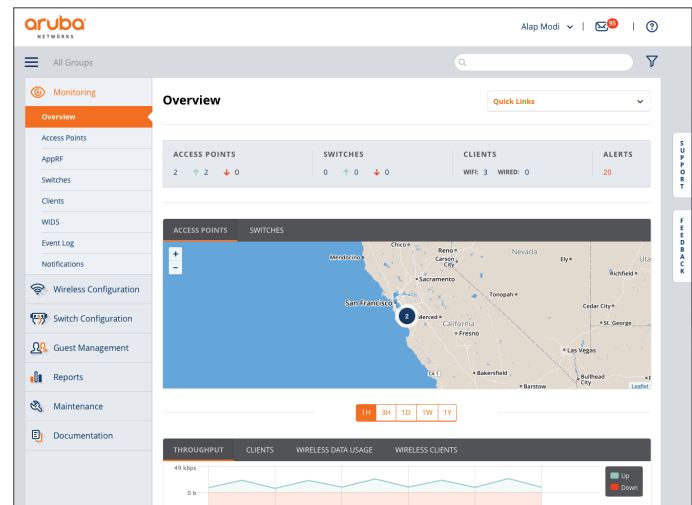

NETWORK HEALTH MONITORING AND TROUBLESHOOTING

Get an at-a-glance summary of your entire network health with an intuitive dashboard, designed to let you drill-down for more information with just a few simple clicks.

On this single dashboard view, you can access metrics for access points (APs), switches, and clients, along with flagged alerts and location mapping.

Easily isolate problems and troubleshoot quickly with simple workflow, granular details and search capabilities.

- Check alerts by searching for AP, switch name, MAC address or serial number, or any other attribute – and then click the device for more details.
- Get information about connected clients, memory usage and firmware for fast troubleshooting.
- Track individual Wi-Fi client data, including signal strength, speed, association history, and device type.
- Identify rogue devices on the network with Wireless Intrusion Detection System (WIDS).
- Launch the command line interface directly into the AP and switch if needed.

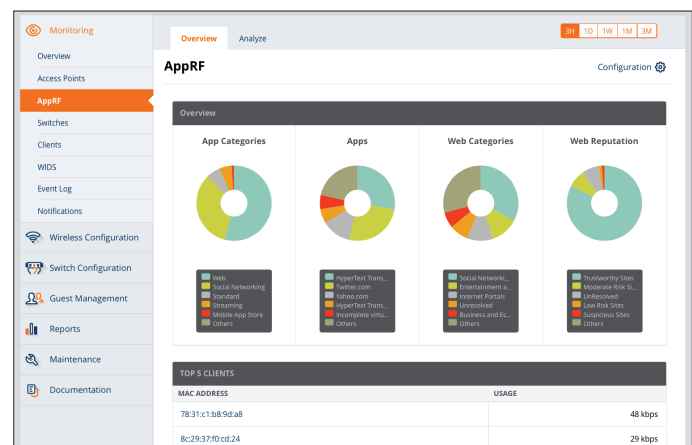

APPLICATION VISIBILITY AND CONTROL

Secure and optimize your network performance with actionable application-level intelligence and web URL classification offered by a dedicated AppRF dashboard.

View and analyze traffic based on individual applications, application categories, web categories, and web reputation.

Leverage the app-specific traffic insight to define and enforce granular access policies.

GUEST WI-FI MANAGEMENT

Customize and simplify visitor access to your network with fully integrated, secure and scalable guest Wi-Fi management included with your Aruba Central subscription.

Choose from several authentication methods for guest access:

- Allow anonymous or self-registered guest logins.
- Enable guest sponsors – such as receptionists, event coordinators and other non-IT staff – to create temporary guest accounts.
- Use social logins with Facebook, Google+, Twitter and LinkedIn.
- Leverage Facebook Wi-Fi if you are a business with a Facebook business page.

Customize mobile-friendly login pages displayed to visitors with your logo, custom welcome messages, terms and conditions, backgrounds, colors, and images, or simply choose from existing templates for a quick and easy start.

ZERO-TOUCH PROVISIONING

Simplify network set up and offload IT resources by directly shipping Aruba Instant APs and Mobility Access Switches to remote sites where a non-technical person can simply unpack, power up and configure them automatically.

Preconfigure Instant APs and Mobility Access Switches in Central. When powered up, they get their configuration and firmware from Central. Your network is up and running in minutes.

MAINTENANCE AND FIRMWARE MANAGEMENT

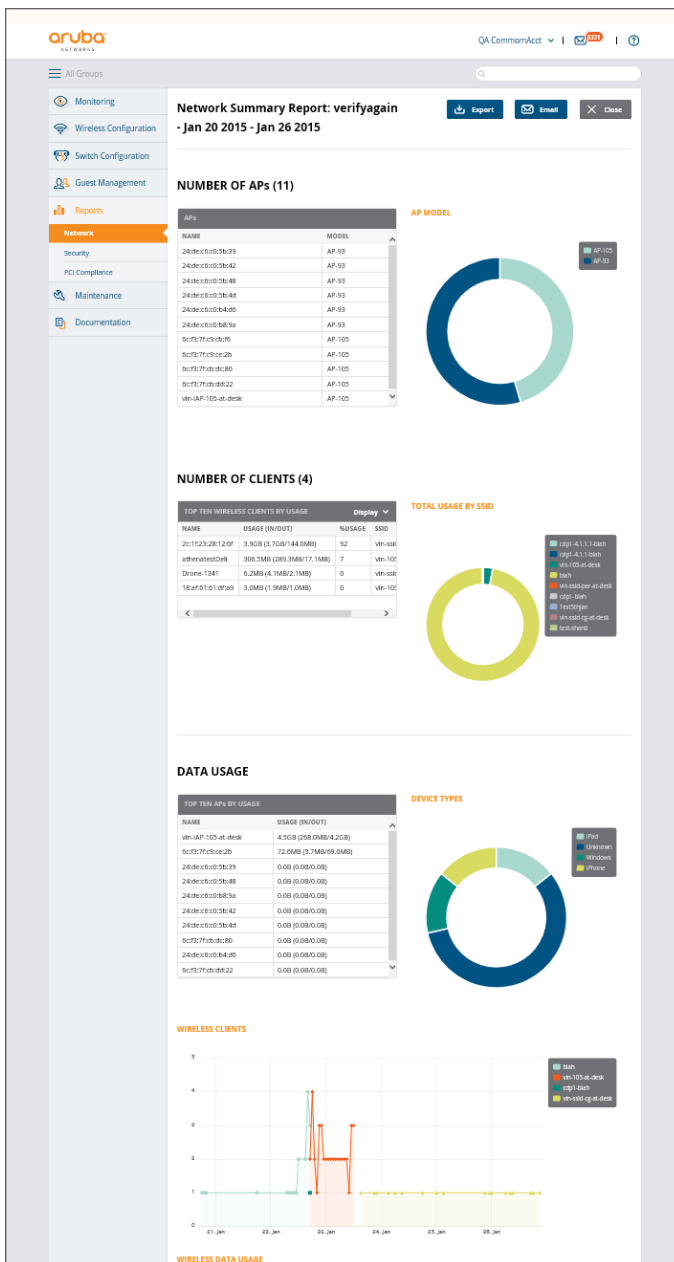

Streamline and automate your network management while maintaining complete control.

- Perform one-click firmware updates or schedule specific updates.
- Manage device licenses and user accounts with different levels of access to Central.
- Create groups and tag devices with labels to simplify firmware management and configuration.

REPORTING

Store your management data indefinitely so you can create reports containing historical data if needed.

- View network, AppRF and security snapshots over a predefined period.
- Schedule reports and receive automated email reports. Export them to a PDF for low-effort monitoring.
- Generate Payment Card Industry (PCI) reports that document proper security scanning was in place, keeping your company compliant with regulatory mandates.

SECURE AND ALWAYS-ON

Aruba Central, designed from the ground up as a cloud application, ensures highest possible availability.

- Web-scale database design for responsive performance, even when working with huge amounts of data.
- Redundancy with clustering and distributed to multiple data centers by multiple providers. Aruba Central ensures uninterrupted service. If one provider experiences performance issues, others remain available and Aruba Central continues seamlessly.
- Global reach with data center locations around the world.
- HTTPS connection with strong mutual authentication using certificates to ensure secure communication with Aruba products. Certificates are stored in Trusted Platform Module (TPM) chips on Aruba hardware for the highest level of protection.

TECHNICAL SUPPORT INCLUDED

Aruba Central has everything you need maintain a fully operational enterprise network, including full technical support. Your Aruba Central subscriptions includes:

- Phone and online support for any technical issues with Aruba Central, Instant APs and Mobility Access Switches.
- Online case management portal to open technical support cases and track their statuses.
- Access to the latest Aruba Instant and Mobility Access Switches firmware releases.

ORDERING INFORMATION

Part Number	Description
SUB1-CNP-IAP-1	1 year subscription for Aruba Central cloud services (Network Management, Web Policy Enforcement) for 1 Instant AP, including access to 24x7 online/phone support
SUB3-CNP-IAP-1	3 year subscription for Aruba Central cloud services (Network Management, Web Policy Enforcement) for 1 Instant AP, including access to 24x7 online/phone support
SUB5-CNP-IAP-1	5 year subscription for Aruba Central cloud services (Network Management, Web Policy Enforcement) for 1 Instant AP, including access to 24x7 online/phone support
SUB7-CNP-IAP-1	7 year subscription for Aruba Central cloud services (Network Management, Web Policy Enforcement) for 1 Instant AP, including access to 24x7 online/phone support
SUB10-CNP-IAP-1	10 year subscription for Aruba Central cloud services (Network Management, Web Policy Enforcement) for 1 Instant AP, including access to 24x7 online/phone support
SUB1-CNP-MAS-1	1 year subscription for cloud based network management for 1 Mobility Access Switch, including access to 24x7 support
SUB3-CNP-MAS-1	3 year subscription for cloud based network management for 1 Mobility Access Switch, including access to 24x7 support
SUB5-CNP-MAS-1	5 year subscription for cloud based network management for 1 Mobility Access Switch, including access to 24x7 support
